

Sales & Profit Dashboard — Project Report

Professional Data Analytics Portfolio Project

Objective: Analyze sales, profit, customers, products, monthly trends and state-wise performance using the supplied Sales_Data dataset.

Metric	Value
Records	100
Sales	■2,305,506.80
Profit	■373,123.74
Profit Margin	16.18%
Quantity	773
Customers	8
States	6

Key Insights

- Total sales are ■2,305,506.80 and total profit is ■373,123.74, giving an overall profit margin of 16.18%.
- 2025 generated higher sales (■1,445,283.39) than 2026 (■860,223.41); the periods are not full-year comparable because 2026 data runs only through 16-05-2026.
- Furniture is the top category by sales with ■945,059.41.
- Printer is the top sub-category by sales with ■363,708.85.
- Karnataka is the leading state by sales with ■452,163.28.
- Priya Singh is the highest-profit customer with ■98,910.50 profit.
- January is the highest-sales month in the available data with ■459,683.83; July is the lowest with ■26,196.17.

Dashboard Components

KPI cards, yearly profit comparison, category/sub-category sales ranking, top customer profit, monthly sales trend, state-wise sales and interactive filters.

Data Quality

The dataset contains 100 records, no missing values and no duplicate full rows. The file contains both Order Date and Order_Date, which represent the same date information in different formats.

Important Limitation

No Order_ID is present. Therefore, 'Transactions' is a safer KPI label than 'Orders'. Also, 2026 data is partial and should not be compared with the full 2025 year without a period-adjusted view.
